Forecast for Thursday 27 Jan 2022

Weather: Snow showers will become occasional through morning, brought in on strong to gale force west then northwest winds. Rain and hail will fall below around 500m with sunny spells inbetween. Showers will lose intensity and become more isolated through afternoon leaving a largely dry and clear end to the day. Few, if any showers reaching the Angus and Ochil Hills.

Chance of cloud-free hill tops above 800m: 50% improving 80%.

Low Cloud and visibility: Frequency of snow showers will lead to very poor visibility with cloud cover variable but occasionally down to 500m or lower. Away from this however, visibility will be very good with some far reaching views on offer. Patches of cloud may linger above 600m or so through afternoon and evening but otherwise should be well broken.

Met Office Aberdeen Meteorologist's View
Nothing to add.

Forecast for Friday 28 Jan 2022
Weather: An early frost under some clearer spells will give way to wet and very windy weather spreading from the west. Light rain and drizzle will become persistent predominantly across the Perthshire Hills with some good shelter given to the east Cairngorms, Angus and Aberdeenshire Hills. Rain turning more widely heavy through evening.

Maximum wind: West or southwest 25-35mph gusting 45-50mph. Winds reaching 70mph across highest ground.

Chance of cloud-free hill tops above 800m: 60% falling to 10%.

Low Cloud and visibility: Cloud will initially be patchy above 600m or so through the early hours, this thickening and becoming extensive through morning. Cloud will lower further through the day, as low as 300-400m in the south at times. Rain and drizzle will turn glens hazy in the west.

Temperature: **Glens:** Minus 1 or 2 Celsius under clear spells through the early hours, gradually rising 8-10 Celsius.
At 800m: Minus 1 Celsius gradually rising to plus 4 Celsius through afternoon.
Freezing level: 800m rising well above summits through morning.
